

RIGGING SERVICES

PSAV[®] is proud to serve as an in-house rigging provider for Jungle Island. This location is equipped with a rigging point system in the Treetop Ballroom. As part of a comprehensive overhead safety and risk management program, the system is annually verified and inspected. We are required to approve all rigging designs and will provide all rigging labor and chain hoists for your event. We look forward to providing you with outstanding service and equipment.

➤ Pre-Show Standards

- The Schedule Rigging Services form must be submitted online along with a scaled rigging plot 21 days prior to load in. **Events scheduled with less than 21 days notice may incur additional charges.**
- A charge of \$250 per event will be assessed for a comprehensive safety review by our Rigging Supervisor. This review will verify point load calculations, staffing needs, equipment needs and CAD support to provide feedback on the initial rigging plot. Additional CAD assistance is available if needed and can be provided for an additional charge.
- Rigging plots must contain all flown equipment in addition to a reflective ceiling plan with hang-points. The Rigging Coordinator will contact you to give you our CAD file as your design template.
- All drawings must be received via email in a .dwg or .dxf format. Hard copies will be accepted in a scale of no smaller than 1/8"-1'.

➤ Rigging Equipment Guidelines

- PSAV is pleased to exclusively provide Prostar Chain hoists. These hoists were designed specifically for hotel & convention center use.
- A scissor lift is required for all rigging calls at this property. All lifts used in this location must have white, non-marking tires and be in good condition. Operators must present documentation verifying that they are trained in scissor lift operations.
- Construction or outdoor lifts will not be allowed.
- All equipment and materials flown must pass ANSI guidelines and be approved by PSAV.
- Any dynamic (moving) element requires an arrester device.
- A steel safety backup is required on each individual item suspended with a nylon sling.
- All nuts and bolts used overhead must be rated and all wire rope clips and overhead hardware (eyebolts etc.) must be forged, unless approved by PSAV.

➤ Treetop Ballroom Standards

- The Treetop Ballroom is equipped with rigging points with various load ratings. Please refer to the facility CAD files for exact locations of the rigging points and ratings. There is **NO RIGGING OTHER THAN BY PSAV.**
- No rigging is allowed from the air-wall tracks except by PSAV.
- All connections to the ceiling or supporting structure of the property must be made by PSAV.
- Flown equipment may only be moved by a PSAV rigger. Adjustments to any flown equipment will only be done under the supervision of PSAV.
- Additional weight cannot be applied to flown equipment after PSAV riggers leave the room.
- Under no circumstances may a person be suspended, walk or climb upon any point or supporting structure attached to the ceiling.

➤ PSAV Onsite Practices

- Late schedule changes or changes to the previously approved and submitted CAD Plot will result in additional charges.
- PSAV will make all connections to the ceiling and assist your staff in attaching those connections to your truss and equipment. Please contact our offices for clarification of what services and equipment we offer to assist you in a safe and cost effective event.
- PSAV will not “dead hang” items over 100lbs or 10’ in length with a scissor lift. Chain hoists or crank towers must be used.
- Cable bridge truss is required when cable bundles exceed four (4) Soco or other similar multi-cable.
